ART-GLASS FEATURES AND BENEFITS

- **Clarity and Light Transmission:** Available in two options to suit your light transmission and privacy needs: the more transparent cathedral or the translucent opalescent.
- **Impact Strength:** Nearly unbreakable, with an impact strength 80 times greater than traditional glass.
- **UV Resistance:** Resists UV damage and blocks over 99% of harmful UV light, protecting interiors and maintaining color vibrancy.
- **Custom Shapes and Sizes:** Can be customized to fit unique designs, including column covers, domes, bar tops, curves, and rounds. Standard panel sizes are 4' x 8', with special orders available up to 5' x 10'.
- **Rigidity and Flexibility:** While Art-Glass offers some flexibility, a translucent honeycomb layer can be added in applications requiring greater rigidity, such as bar tops, platforms, and standing surfaces.
- **Recyclable:** An eco-friendly option, as it can be reused, recycled, and reclaimed.

Polymer Art-Glass Panels by Stained Glass Inc.

Advantages

- Beautiful
- 80 times stronger than glass
- Large 4' x 8' or 5' x 10' sheet sizes
- Custom sizes and shapes
- Simple to fabricate and install

Applications

- Bartops
- Signage
- Partitions
