Stained Glass for Conservatories and Greenhouses

Conservatories, greenhouses, sunrooms and solariums can all benefit from Stained Glass Inc. stained glass panels. Stained glass serves to beautify these dramatic rooms and buildings without sacrificing practicality.

Stained Glass Inc. designers have the ability to create a unique sunroom or greenhouse composed entirely of stained glass because we use shatter resistant polymer glass to create our designs. The polymer glass boasts up to 250 times the strength of ordinary stained glass. It's strong, impact resistant, and will stand up to outdoor elements like hail and wind.

Additionally, Stained Glass Inc. translucent, all-weather stained glass panels soften the sunlight and provide added UV protection, all while allowing your plants and flowers to receive the benefits of full sunlight they need to stay healthy and beautiful. Our eye catching solariums offer increased privacy from neighbors and onlookers. We fuse mineral pigments directly to the glass to ensure the color will stay bright, even in direct sunlight. Our quality polymer glass windows require little maintenance and maintain their beauty throughout the year.

If you are looking for a more traditional way to incorporate stained glass in your conservatory, Stained Glass Inc. can provide you with window inserts.

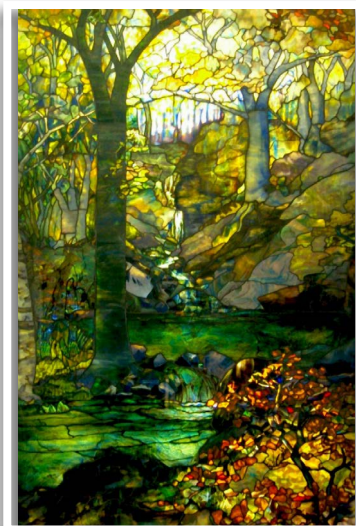

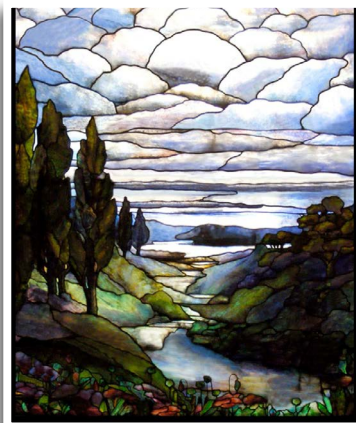

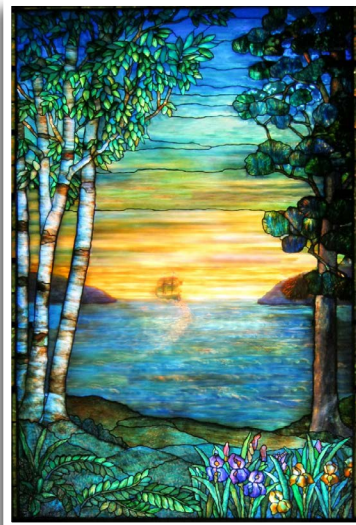

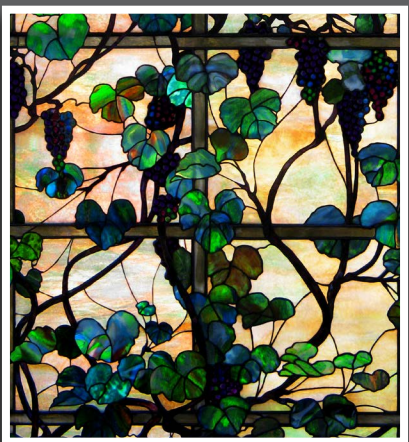

These inserts are easy to install and can be customized to fit any size, shape, or color you desire. You may also consider simply adding stained glass suncatchers to hang in front of regular windows.

Our talented team of designers will be happy to assist you in designing a beautiful stained glass insert for your custom solarium.

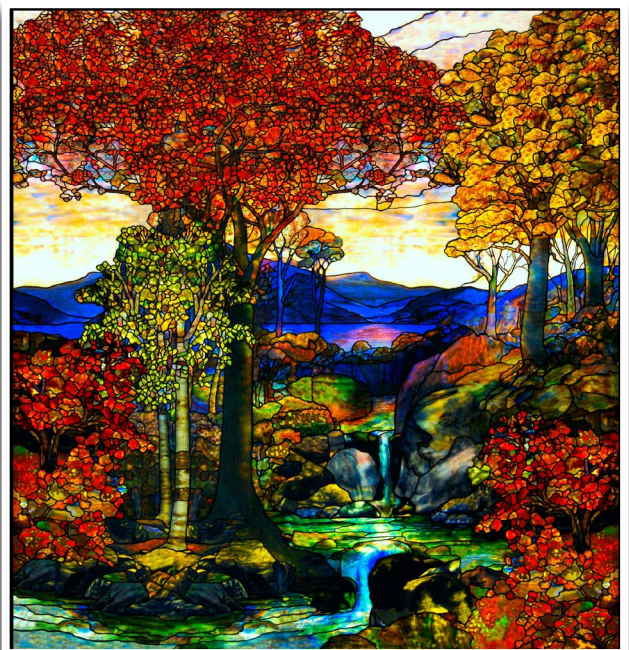

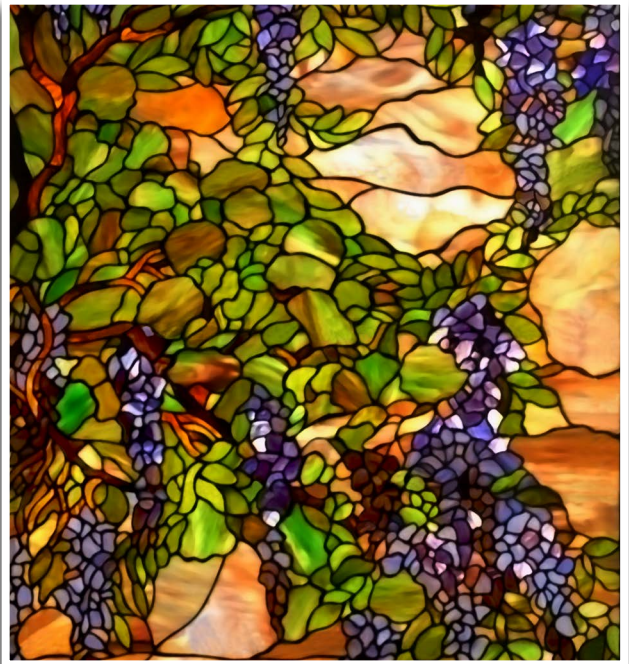

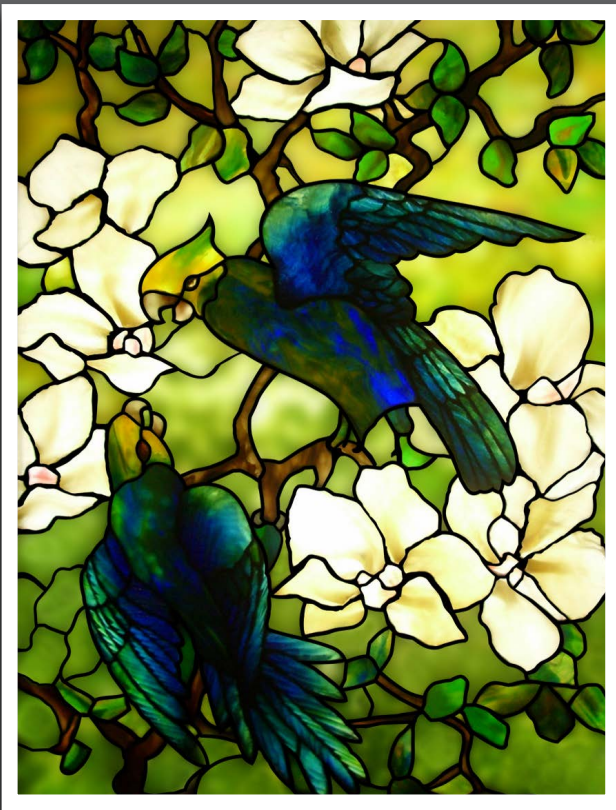

Applications of stained glass for conservatories and greenhouses:

- Create a unique sunroom composed entirely of durable and beautiful stained glass.
- Add stained glass walls to your house for a sunroom completely enclosed in rich stained glass.
- Add stained glass windows to existing sunrooms, conservatories, solariums and greenhouses.
- Inserts can be installed over existing windows for a more traditional look.
- Hanging stained glass suncatchers.

Benefits of Stained Glass in Conservatories and Greenhouses

- Provides long lasting weather resistance.
- Aesthetic appeal all year long.
- Increased privacy and UV protection.
- Adds beauty and appeal to your new or existing greenhouse.
- Always made in America and 100 percent lead free.
- Simple installation requires less time and money.
- Shimmering mineral pigments fused directly to glass to ensure lasting color.
