Stained Glass for Sidelights

Homes, churches, chapels, cathedrals and businesses can benefit from the beauty of stained glass sidelight window inserts. A stained glass sidelight window is a tall, narrow window that borders each side of a main doorway.

Sidelight windows noticeably increase the size of a doorway entrance, especially when viewed from the outside. Allow Stained Glass Inc. to create beautiful stained glass inserts for sidelights that will add vibrant color and rich texture to your existing décor.

The beauty of choosing Stained Glass Inc. is that all of our stained glass inserts are custom fit to your existing windows. It doesn't matter the size or shape of your sidelights, we can design inserts that will install easily and fit exactly. Additionally we also design stained glass inserts for transom windows to complete the stained glass look of your doorway. We can create stained glass sidelight inserts that perfectly match your style and add true beauty to your entrance.

Stained Glass Inc. designers have the ability to create unique sidelight inserts that are not only beautiful, but made to last. Our shatter resistant polymer glass boasts up to 250 times the strength of ordinary stained glass. It's strong, impact resistant, and will stand up to outdoor elements like hail and wind.

Additionally, Stained Glass Inc. translucent, all-weather stained glass panels soften the sunlight and provide added UV protection without compromising privacy. We fuse mineral pigments directly to the glass to ensure the color will last, even in direct sunlight. Our quality polymer glass windows require little maintenance and maintain their beauty for generations.

Our talented team of designers will be happy to assist you in designing beautiful stained glass inserts for your sidelights. You can choose a design from our huge collection or our artists can help you create the custom design you've been hoping for.

Benefits of Stained Glass for Sidelights

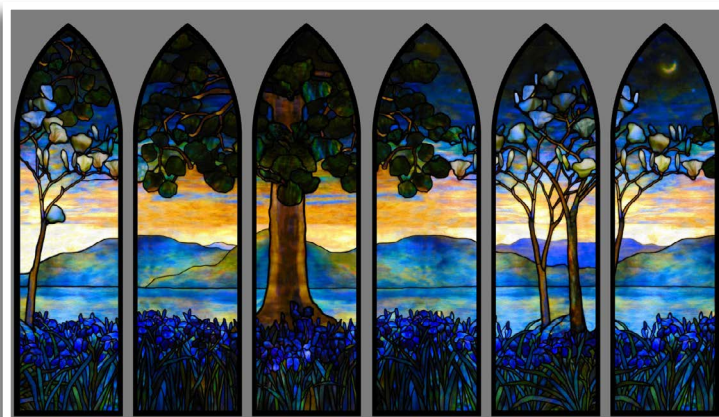

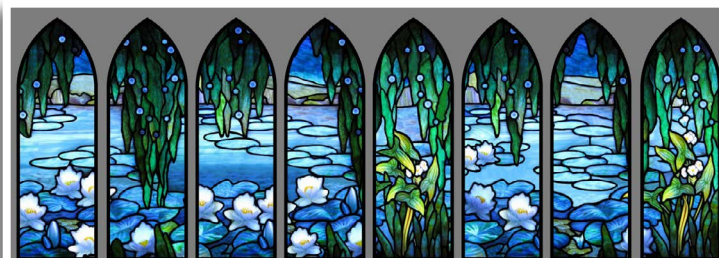

- Provides long lasting weather resistance.
- Aesthetic appeal all year long.
- Increased privacy and UV protection.
- Adds beauty and appeal to your new or existing sidelight windows.
- Always made in America and 100 percent lead free.
- Simple installation requires less time and money.
- Shimmering mineral pigments fused directly to glass to ensure lasting color.

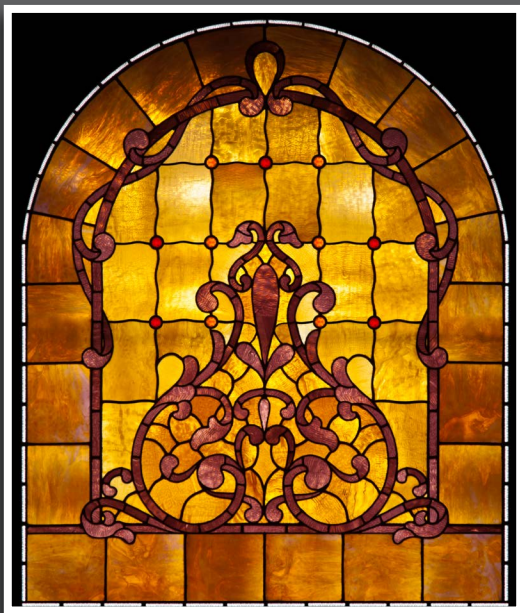

The Stained Glass Inc. Difference
