STAINED GLASS TRANSOMS

FINDING, SELECTING AND BUYING STAINED
GLASS TRANSOMS AND INTERIOR WINDOWS

Stained Glass Window 2810:
Florem

You're probably at this page because you're looking for a **stained glass transom**. You're searching for the **best stained glass transom** options for your home, business or church. Or maybe you're just looking for design ideas. So, let's take a look at how we can help you find the **stained glass transom** that's right for your project.

THE WORLD'S LARGEST SELECTION OF STAINED GLASS TRANSOMS

Here you will find the **world's largest selection of transoms in stained glass**. All offered at the best pricing and with the fastest service. Here are more styles, sizes, shapes and designs of stained glass transoms than anywhere. You have found the source for **stained glass transoms**.

GET BEAUTIFUL STAINED GLASS TRANSOMS IN THE LATEST HIGH PERFORMANCE MATERIALS

We offer the strongest, lightest, most beautiful stained glass transoms ever. How?

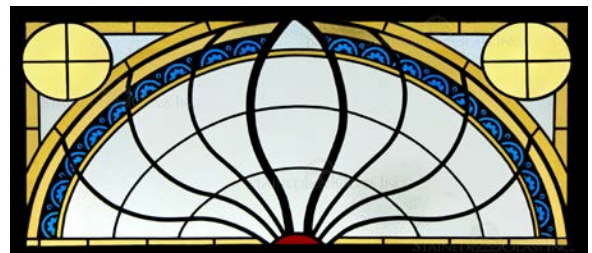

Ordinary **stained glass windows** are made with mineral pigments and glass, then cut and joined with lead. **At Stained Glass Inc.**, we begin with the finest mineral pigments ground ultra fine and then apply them to high performance polymer glass and heat fuse them. The panel is then safety laminated for additional strength (similar to a car windshield). The proprietary and patent pending process gives you several benefits.

IS IT A TRANSOM FANLIGHT OR A SUNBURST?

In the USA we use the term **transom or transom light** for the window over a door or a larger window. Arched or elliptical transoms, especially ones where the pattern radiates out like an old fashioned hand held folding fan, are referred to as fanlights. They are sometimes also referred to as sunbursts or sunburst lights. In French, a transom is a “vasistas”, in Spanish a “travesano”, or “montante de abanico” and in the UK, the term “overlight” or “hopper” is sometimes used.

STAINED GLASS TRANSOM APPLICATIONS

Over Doors

Stained Glass Transoms are ideal for over both interior and exterior doors.

Over Windows

Above another window to filter harsh sun.

TRANSOM FAQ

How Do I Measure For a Stained Glass Inc Transom? For existing transom windows, the stained glass panel fits next to the existing glass and fits within the existing frame. You want to measure the clear opening where the panel will fit. See the drawing below.

For new interior transoms over hallways or openings where there is no glass, the panel fits within the opening.

What do I Get When I Order a Transom? You get a laminated polymer stained glass panel in a metal frame. The panel is custom sized to slip into your existing opening.

Can I Get Custom Sizes? Absolutely. Custom is what we do. Your stained glass transom is made to fit.

Who do I Get to Install my Transom? Most people can install a Stained Glass Inc transom insert themselves.

The panels are made to fit and most installations take just a few minutes. If you are not a DIY type person or the job seems too large to do it yourself, any carpenter or window installer should be able to do it for you.

What About Exterior Use? Stained Glass Inc panels are single glazed units designed to be installed as inserts on the inside face of your existing windows. You use your insulated glass windows for the outside face and then slip the insert up next to them from the inside.

Can I Use My Transom Over a Wet Area, Like Over a Shower or Bath? Yes

How Soon Can I Get My Transom? We try to ship all orders in less than two weeks from approvals. If you need it even faster us know. We can sometimes speed up the process or use airfreight.

I Want A Stained Glass Transom in Canada. Do You Ship To Canada? Yes. There are some taxes and import duties that are the responsibility of the customer.

What Architectural Styles of Transoms Are Available?

There are transom windows in every style, shape and size:

- Arts and Crafts
- Art Deco
- Art Nouveau

- Mission
 - Contemporary
 - Georgian
 - Prairie
 - Tiffany
 - Traditional
 - Transitional
 - Tudor
 - Victorian
- And many more!
