Old stained glass windows have a wonderful aesthetic appeal and add color and beauty to any building. Our old stained glass window replicas are made of the highest quality products and are stronger than traditional stained glass windows. We use polymer glass to make our old stained glass windows. Polymer glass is the material used in automobile lights, visors for motorcycle helmets, deep sea submersible windows and aircraft windows. Besides being virtually unbreakable our old stained glass windows look exactly like antique stained glass and shine exquisitely in the sun.

THE BEAUTY OF OLD STAINED GLASS WINDOWS AND LIGHT

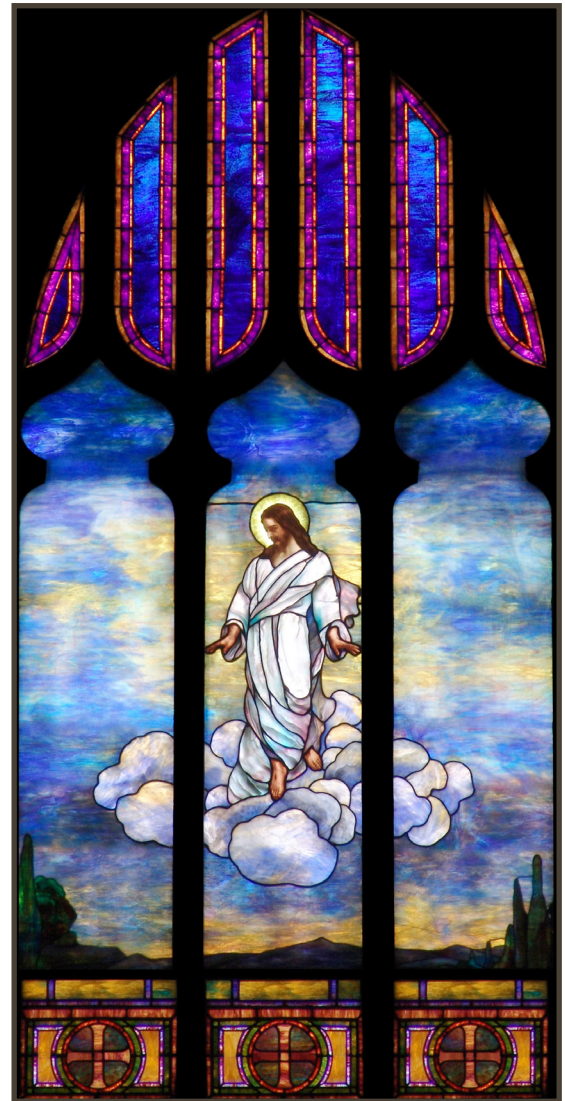

Old stained glass windows transform a room or building and add an enchanting feel like nothing else. As the sun shines through old stained glass windows, a sort of magic happens. The light dances around and covers everything with color. At night artificial light calls attention to old stained glass window replicas. The same lighting you have now can be completely altered by the addition of old stained glass windows.

STAINED GLASS WINDOWS FROM STAINED GLASS INC. ARE LIGHTWEIGHT AND AFFORDABLE

Old stained glass windows tend to be very heavy and expensive. Our old stained glass window replicas from Stained Glass Inc. are much more affordable and weigh less than the originals. Our polymer glass is lightweight so you will have no problems installing your old stained glass window replicas. The polymer glass is also less expensive to work with than traditional glass, so old stained glass window replicas are less expensive than typical old stained glass windows. Because we manufacture all of our own windows ourselves, they are sold at wholesale prices.

OUR OLD STAINED WINDOW PROJECTS

We have created old stained glass window replicas for various churches, basilicas and cathedrals. Our religious old stained glass windows replicas are a beautiful sight to behold. We offer a huge selection of old stained glass windows for different Christian
