

# Jeff B., TMB Construction for Private Residence

Residential stained glass is a beautiful way to add color to your home without breaking your budget. Stained glass adds a stylish touch of pigment and detail that brings beauty to every room. Stained glass for your home can come in many shapes and sizes and any style, depending on your taste. At Stained Glass Inc. we have a very extensive selection of stained glass designs. We can also create custom stained glass that meets our client's every desire.

Jeff B. with TMB Construction in California was seeking the perfect stained glass piece for a client's home. We helped Jeff find a piece similar to what he was looking for, then one of our talented designers customized the panel to make it perfect. A woodland scene showing mountains, a forest and a stream was chosen from our gallery and then our artists added a roaming bear to help it flawlessly fit the customer's need.

*"Everything looks good," stated Jeff. "Please let everyone know they did a very nice job. It will certainly be a nice addition to the house..."*
